

Platinum Mini

AM113

The Platinum Mini is a small, handy solar charger in pocket format. It is an ideal solution to your charge any smartphone or other mobile device whilst on the go. The device has an internal 1200mAh Li-Ion battery. Apart from being charging by USB or Mains, this item can also be charged by use of the Sun, via the built-in solar panel. Simply place the Platinum Mini in direct sunlight, and the charging cycle starts instantly. The internal battery will automatically store the energy and give it back whenever you need it. Even in the dark.

This handy and compact Platinum Mini is ideal to take anywhere. It weighs only 55 grams, making it super-lightweight. The Platinum Mini comes with a set of 6 connectors, so you can charge all kinds of different mobile devices right out of the box.

Suitable for charging, your phone, GPS, MP3 player, PDA, etc.

The front of the Platinum Mini has a LED battery status indicator, so you always know how much extra power is stored in the device. The Platinum Mini is perfectly suited to be individualized by a (company) logo.

In Short:

- **Light as a feather**
- **Compact design**
- **Emergency back-up power**
- **Excellent price / performance ratio**
